

DIGIODESIGN PORTFOLIO

DigioDesign

Cambridgeshire based design and construction.

We are a Cambridgeshire based design and construction company, with a refreshing approach to design of your living environment. We have worked on a variety of projects, from modern garden designs through to extensions and new dwellings, as well as major refurbishment projects.

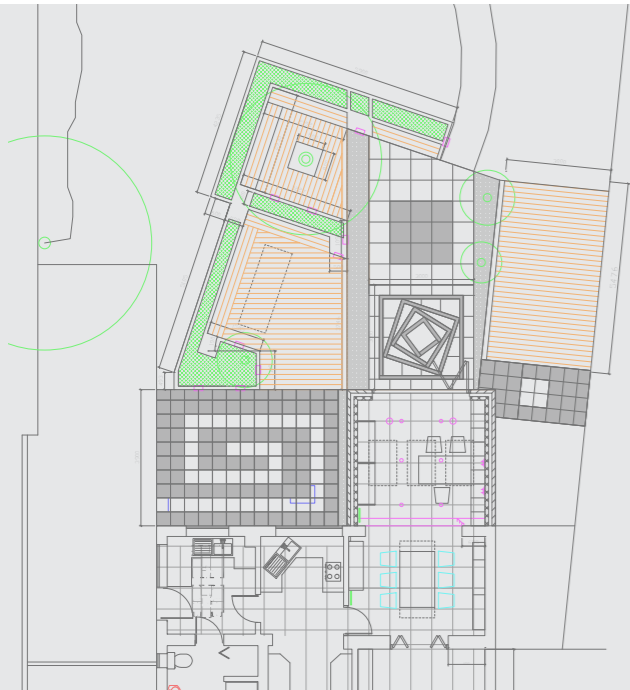

Single storey extension

Creative openness.

A single storey extension is often a cost effective way to provide additional space - without the hassle or expense of moving. Within a certain size most extensions do not require planning permission, which helps

reduce the time to complete your project. Extend from a dining or living room, and open your house into the garden. With options such as Velux windows and bi-folding doors, you can have a light, airy space created for

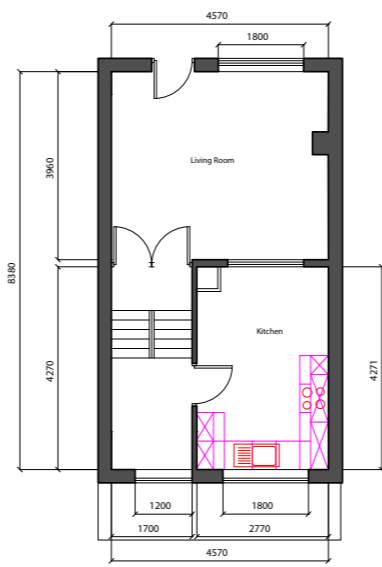

you. We can also incorporate feature lighting, cabling and audio visual components into your new room, removing unsightly cables from view, and enhancing the overall experience.

Kitchen

High quality - but affordable - finishes. We pride ourselves on our attention to detail on finishes, especially with tiling, plastering and decoration.

Existing Plan

Proposed Plan

Kitchen refurbishment

Functional design - perfectly practical.

The kitchen really is the heart of the household, but is often overlooked when it comes to a highly functional design. We try to maximize the space available with a bold, modern look and feel, paying attention to the placement of units, storage and appliances and how the whole area 'flows' as a work space.

Before

After

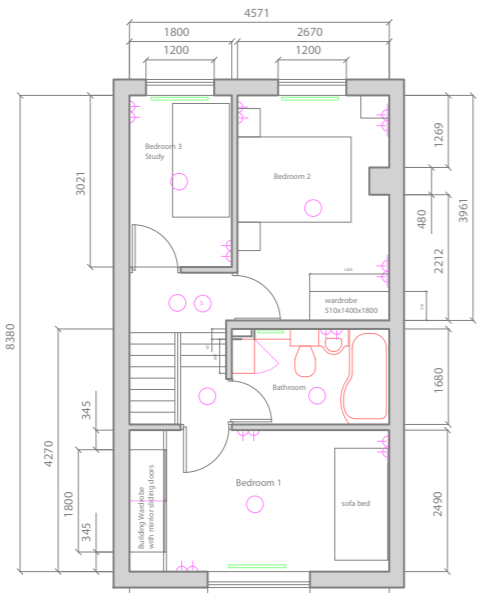

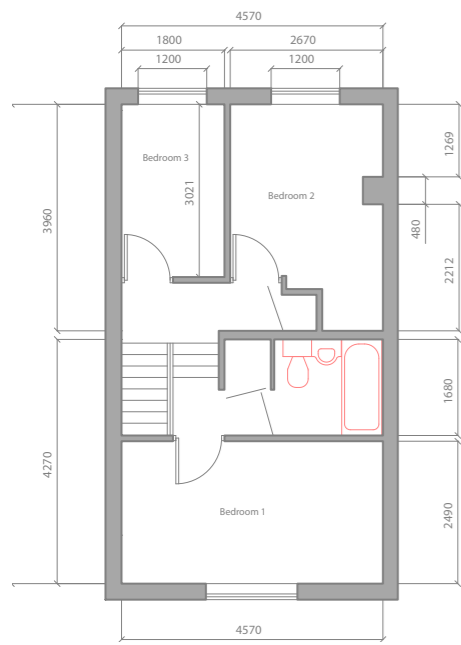

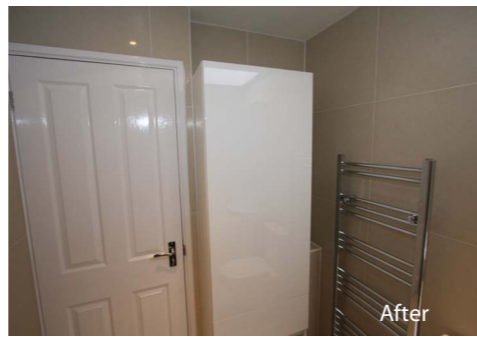

Bathroom refurbishment

Out of the ordinary.

Fancy that '5-star' hotel bathroom felling at home? Floor to wall porcelain tiling, large walk-in shower cubicles or an oversized shower bath perhaps? Or a heated floor for the winter? We can take the or-

inary and turn it into the extraordinary! But a good bathroom starts with a solid design and a solid foundation, with items such as waterproof panels behind tiling to ensure there are no leaks. Ever.

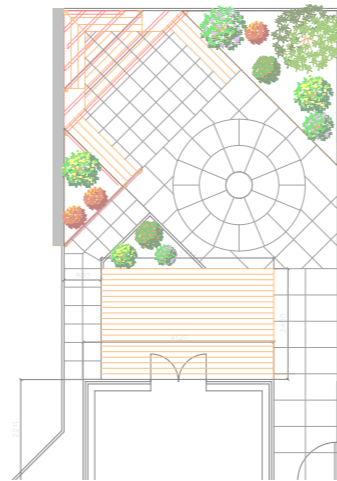

Bathroom

Bespoke garden & decking design
The exterior reflects inner values.

With the modern garden in mind, let us help you bring the outside in and extend your living space with a different approach to design, from low-maintenance designs to something far more indulgent and unique. Your own corner of tranquillity to escape to.

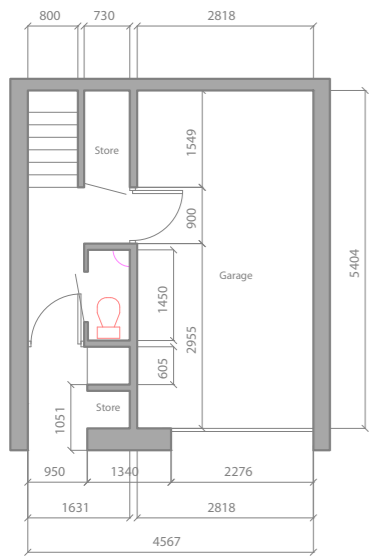

Garage Conversion

Park yourself in a new room.

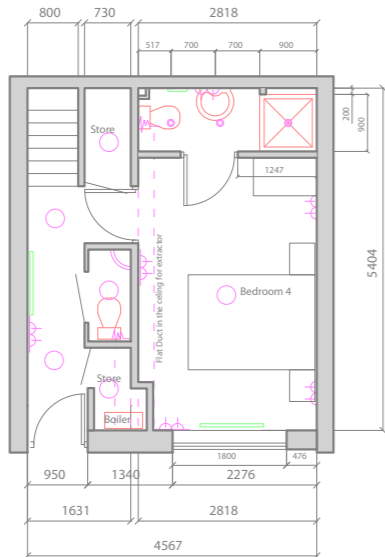

Almost all garages that we see these days are not used to their full potential and are generally a storage area for unwanted items that we can't bear to part with. Most garages very rarely see a car parked inside compounded

by the fact that garage sizes have not kept up with car sizes, so it can be a bit of a squeeze to get the family car in and the doors open! But with our help, we can turn that under utilized space into a valuable new

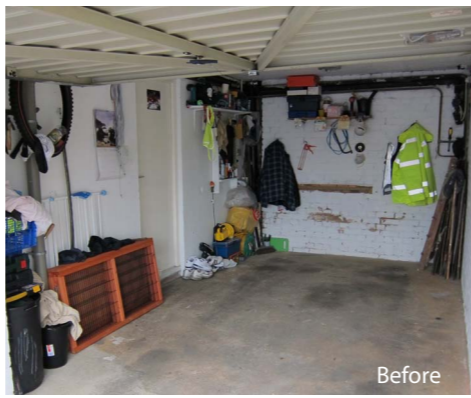

room, adding space to your existing house, and potentially adding a great deal of value. Add another double bedroom, complete with en-suite bathroom as shown below.

Bespoke storage
Superior design for practical storage.

Seamlessly integrated into any corner -
under the stairs, above the stairs - or even in
the stairs, allows you to maximise every inch
of space and ensure a relaxing and clutter
free environment.

Staircase makeover The showpiece of your home

We can help you to design a stylish and distinctive staircase to your home. Invitingly friendly and tactile, light and airy, functional and individual.

DIGIODESIGN

Our team is made up of qualified architects with an award-winning portfolio stretching around the world. Their experience brings a wealth of new ideas to the table, and a different approach to the design of your project. On the construction side, we have an extremely talented multi-disciplined team able to cover all elements of construction, from plastering, painting and brick laying through to plumbing and electrics. All properly accredited and certified.
